Offering a training day that explores how the process of accreditation can drive school improvement and unify members of the school community to provide effectively for the educational needs of their pupils.

The day will include sessions that inform and develop a better understanding of the processes involved in accreditation and the skills needed to evaluate and improve a school's effectiveness.

### **Rationale**

Good schools maintain high standards and demonstrate an ongoing commitment to school improvement. Parents rely on schools to deliver their promise and provide a good education for their children. School leaders and managers need to understand their schools and encourage all members of the school community to work towards providing an effective education for every individual.

**But what does this mean and entail?** Sessions will focus on knowing your school, exploring ways to support your staff as they provide for the educational needs of your pupils.

### **CfBT's Training Day will focus on:**

- What is meant by school improvement
- How the process of quality assurance and accreditation can support school improvement and involve all members of the school
- Recognising educational good practice and international standards
- The BSO Inspection requirements and expectations in the UK
- Knowing your own school and how to make the most of the external and internal aspects of the accreditation process.
